

## **Magal S<sup>3</sup> and ICx Technologies announce partnership agreement**

**YAHUD, Israel and Arlington, Va., U.S.A. (Sept. 18th, 2009)** - Magal S<sup>3</sup> (**NASDAQ GMS: MAGS, TASE: MAGS**) and ICx Technologies (**NASDAQ: ICXT**), today announced a partnership agreement whereby Magal will offer ICx ground-surveillance radars, as part of its overall outdoor- and perimeter-solutions portfolio.

“As a solution provider, Magal offers a very broad selection of sensors, but we recognize the growing demand for wide area surveillance technology in the more critical Perimeter Intrusion Detection Systems applications,” said Eitan Livneh, recently appointed CEO of Magal S<sup>3</sup>.

“Working with ICx will extend our solutions offering, enabling early warning beyond the perimeter and enhanced situational awareness once the perimeter has been compromised.”

“Radar is also a vital component in poor visibility conditions. Customers today realize the strength of fusing a wide array of sensors and algorithms into a single coherent solution. Ground surveillance radar products from ICx extend our capabilities ‘beyond the fence’,” Livneh added.

Mike Mostow, vice president of sales for Systems Products within the Surveillance Group at ICx Technologies said, “We are very excited about our partnership with Magal. It expands our sales reach globally and will allow us to better support our rapidly growing international customer base. We also recognize the growing demand for comprehensive, all encompassing multi-sensor perimeter security solutions.”

Magal typically supplies turnkey solutions, integrated into its Fortis platform – an advanced, wide area, GIS-based C&C system (Command and Control), which synchronizes, correlates and fuses all sensors and subsystems. One project currently underway is in an airport in the Far East, which includes four ICx-1400 radar systems as part of a broader perimeter solution.

### **About ICx Technologies™**

ICx Technologies is a leader in the development and integration of advanced sensor technologies for homeland security, force protection and commercial applications. Our proprietary sensors detect and identify chemical, biological, radiological, nuclear and explosive threats, and deliver superior awareness and actionable intelligence for wide-area surveillance, intrusion detection and facility security. We then leverage our unparalleled technical expertise and government funding to address other emerging challenges of our time, ranging from a cleaner environment and alternative energy to life science.

### **About Magal S<sup>3</sup>**

**Magal S<sup>3</sup>** is a leading international solution provider, in the business of Security, Safety, and Site management (NASDAQ: MAGS). Based on 35 years of experience and interaction with customers, the company has developed a unique set of solutions and products, optimized for perimeter, outdoor and general security applications. Magal S<sup>3</sup>'s turnkey solutions are typically integrated and managed by a single sophisticated modular command and control software. Magal S<sup>3</sup>'s broad portfolio of critical infrastructure and site protection management technologies includes a variety of smart barriers and fences, fence mounted detectors, virtual gates, buried and concealed detection systems as well as a sophisticated protection package for sub-surface intrusion. A world innovator in the development of CCTV, IVA and motion detection technology for outdoor operation, Magal S<sup>3</sup> has successfully installed customized solutions and products in more than 75 countries worldwide.

This press release contains forward-looking statements, which are subject to risks and uncertainties. Such statements are based on assumptions and expectations which may not be realized and are inherently subject to risks and uncertainties, many of which cannot be predicted with accuracy and some of which might not even be anticipated. Future events and actual results, financial and otherwise, may differ from the results discussed in the forward-looking statements. A number of these risks and other factors that might cause differences, some of which could be material, along with additional discussion of forward-looking statements, are set forth in the Company's Annual Report on Form 20-F filed with the Securities and Exchange Commission.
