

## Magal Expands Its Activity Into Cyber Security

**Yehud, Israel – Nov. 6<sup>th</sup> 2012 - Magal Security Systems Ltd. (NASDAQ GMS: MAGS)** today announced that it has expanded its business proposition and will start delivering cyber protection solutions to its existing and new customers.

Magal's new solutions will monitor, detect and protect against abnormal network activity, both landline and wireless, within and close to protected sites. Magal is teaming with third party technology companies to deliver turnkey cyber security solutions for critical sites, and will offer an integrated suite of solutions for both the physical and networked world.

As a first step, Magal will deliver cyber protection for the actual security network, which may itself be exposed to cyber attacks. Magal will subsequently provide a full umbrella for critical sites, covering the core production systems, infrastructure and information systems.

**Eitan Livneh, President and CEO of Magal S<sup>3</sup>**, commented: "The traditional physical threats to sensitive sites are now exacerbated by cyber threats, which have the potential to jeopardize the mission of our customers. Unlike the physical space, deterrence barely exists in cyberspace, and therefore in this cyber decade, seaports, airports, power utilities, cities and in fact, any business cannot be left protected with only physical security."

**Continued Mr. Livneh**, "With 42 years of proven security experience, we are now launching a new paradigm of integrated physical and cyber security, managed through a unified Security Operation Center (SOC) by Fortis<sup>4G</sup> – our latest command and control system. We can now deliver turnkey solutions, based on our partners' products as well as third party technologies. We will also provide full technical services, including threat analysis, overall design, implementation and ongoing upgrades."

### About Magal S<sup>3</sup>
