PRESS RELEASE

MAGAL PRESENTS NEW TECHNOLOGIES FOR THE OVERLAPPING PHYSICAL AND CYBER SECURITY MARKETS

YAHUD, Israel – Nov. 21st, 2013 -- Magal Security Systems, Ltd. (NASDAQ GM: MAGS), together with Israel Defense Magazine, concluded a successful conference attended by 200 executives from the Israeli security industry. New technologies for the overlapping physical and cyber security markets were presented at the conference.

Keynote speakers included: Mr. Zori Kor, former head of Technology in the Israeli National Information Security Authority and Brigadier General (Ret.) Nitzan Nouriel, former head of the National Security Council & Counter Terrorism Agency in Israel.

Eitan Livneh, President and CEO of Magal, commented: "I am encouraged that so many security consultants, industry and cyber security experts have reacted positively to our presentation and are supporting and invigorating Magal's new paradigm of consolidating cyber security with physical security for critical sites."

Continued Mr. Livneh, "I want to thank Israel Defense Magazine, who organized the conference and gave us the opportunity to present CyberSeal, a company acquired by our company last year, which recently launched two suites of cyber security products. This event marks the initiation of our strategy for 2014, launching new products for securing wired networks, cellular communication, with a new generation of solid state smart fences as well as a new version of Fortis^{4G}, which now unites the management of cyber and physical security."

More about the new presented products

CyberSeal presented and demonstrated its new line of cyber products:

- **Tungsten** - a ruggedized Cyber Security Ethernet switch, embedded with cyber security software engine and optimized for outdoor security and SCADA networks.
- **Cobalt** – a one-way Ethernet/IP network gateway (Data Diode) that provides hermetic isolation between distinct networks.
- **Yttrium** and **Vanadium** - both belong to the IMSI catcher family and enable the monitoring of illegal RF activity near or within critical sites.

Magal also demonstrated a new line of sensors and systems for physical security of critical sites:

- **RoboGuard** - a revolutionary agile robot for perimeter protection, running along smart fences and capable of responding promptly to intrusion alerts. The autonomous robot, travels on a monorail and can support various payloads such as cameras, intercom, deterring spray gun, etc. RoboGuard is powered by batteries that are automatically recharged every few hours.
 - **DTR^{4G}** – a new generation of taut wire smart fence based on an innovative dual-technology sensor.
 - **Fensor** - a solid state fence mounted sensor that replaces the electro-mechanical technology used by Magal in the past.
-

All the demonstrated systems and sensors at the exhibition were integrated through Magal's flagship system for Command & Control - **Fortis^{4G}**. A new version of the system was presented, capable of performing both - PSIM (Physical Security Information Management) alongside CSOC (Cyber Security Operation Center) for improved situation awareness and intuitive operation.

About Magal S³

Magal S3 is a leading international provider of solutions and products for physical and cyber security, safety and site management. Over the past 42 years, Magal S³ has delivered tailor-made solutions and turnkey projects to hundreds of satisfied customers in over 80 countries in some of the world's most demanding locations.

Magal S³ offers comprehensive integrated solutions for critical sites, managed by **Fortis^{4G}** – our 4th generation cutting edge **Physical Security Information Management** system (PSIM). The solutions leverage our broad portfolio of homegrown **Perimeter Intrusion Detection Systems (PIDS)**, advanced outdoors **CCTV / IVA** technology and **Cyber Security** solutions.
